png to a bestselling book (download here). In this article I have developed a simple approach for creating and presenting an effective story. I want to share the journey I took to create the book that changed the way people talk about making money online and changed the way they teach others to make money online. Taking a closer look at my story I'm going to look at the three most important elements of a good story and provide tips and strategies for crafting an effective story. So, if you have ever tried to share your story with someone, you know that a good story has some of these elements: 1. Focus 2. Clarity 3. Emotional punch 4. On point examples If you can show your audience that you understand these four components of a good story, then you have a good chance of creating an emotional connection to your story. The focus of your story will be to show the audience that you are smarter than them. You are going to show that you know things they don't know and you have a better plan. This is a more complicated concept than it sounds. It is very important that you understand the exact point of what you want to communicate with your audience. When I first started out with my story, I wanted to show that I understood something that most people didn't understand. It's not a bad thing to want to show that you are smarter than your audience but you have to know what it is that you want to prove. Clarity is the key to a compelling story. Being able to clearly communicate to an audience what you want to say will help them understand what you want to say. A good story has to have emotion. If you are not feeling it, the people in your audience will not be feeling it either. Even if you are not connected with the audience, as long as you are relating something they will understand you will create a compelling story. Once you understand what you want to tell your audience, it's time to put that into action with examples. Don't leave your audience wondering what you are talking about. Show them exactly how it works and show them where they can implement it. Being able to show your audience an example of what your story can look like, will help them understand your story more deeply and make them a lot more interested in what you are saying 82157476af
